DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

species I)	figure 5
species II)	figure 10
species III)	figure 14
species IV)	whichever figure relates to claims 12 and 29 (which does not appear to be shown)
species V)	figure 18
species VI)	figure 20

The species are independent or distinct because: species I is directed to a transmission filter that uses a transmission characteristic that has a peak between the two C and L bands; species II is directed to a transmission filter that uses a transmission characteristic that has a crest between the two C and L bands; species III is directed to a transmission filter that uses a transmission characteristic that have two peaks in the center of the two C and L bands; species IV is directed to a transmission filter that uses a transmission characteristic that have two crests in the center of the two C and L bands; species V is directed to a transmission filter that uses a transmission characteristic that has a slope from C band and L band; and species VI is directed to a transmission filter that uses reference light signal located between each S, C and L bands.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2613

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
